Agile Quiet Booths - Acoustic Solutions - Custom Joinery - Education Furniture - Interior Fitouts - Plant Walls
Pod Seating - Quiet Pods - Storage - Task & Soft Seating - Teachers Wall - Work Stations

What makes for an AGILE Workspace?

As opposed to the traditional classroom layout, the primary goal of an agile learning environment is flexibility.... **Agile** design allows for the different ways students learn. By creating **freedom** and **flexibility** with-in the workspace encourages, **productivity, creativity** and **space-efficiency!**

What do we do @ AGILE-Xtra?

We work with your existing environment or new space to create an **Agile** working space, that **enhances** the way your organisation works, the way your staff **performs**, the way your students **learn**.

Acoustics & Aesthetics - Wall & Ceiling Treatments

System Walls - Freestanding & Fixed

Agile Learning in a Classroom Environment!

The environment of a classroom has a significant impact on the academic achievement of each student.

Mark Osborne has been a leading global educator for over 20 years, working with schools to maximise the potential of their learning space, *“my mission is to help schools become awesomeness incubators. I help them build great places to learn and the capacity to use those spaces well.”*

Armed with the knowledge gained along the way, Osborne has identified some key principles for the design of learning environments, which are:

- * A variety of learning zones (such as direct instruction, collaboration, individual study and investigation)
- * Appropriate accessible storage that maximises that amount of learning space
- * Breakout spaces connected to classrooms
- * Connection, transparency and openness throughout the learning spaces
- * Comfortable furniture to support concentration and reflection
- * Furniture that supports cooperative and collaborative learning
- * Furniture that promotes movement and physical activity
- * Large accessible displays for information and celebration of student learning
- * Optimal heat, light, acoustics and ventilation
- * Strong connection to the outdoors
- * Three acoustic zones; quiet study, normal conversation classroom level and group brainstorm activity zone.
- * Uncluttered spacious use of furniture
