

**POWER & CHARGING SOLUTIONS**  
*designed for* **EDUCATION SPACES**

With the growing reliance on mobile devices, it is more important than ever for education facilities to provide power and mobile charging amenities for their students, faculty members, and guests.

OE Elsafe work with facility planners to create complete power solutions for education libraries, theatres, cafeterias and open spaces. Our power modules can be fitted into desks, tables, panels, lockers and seating so that every space can provide power and fast charging precisely where it is needed.

## PIXELTUF

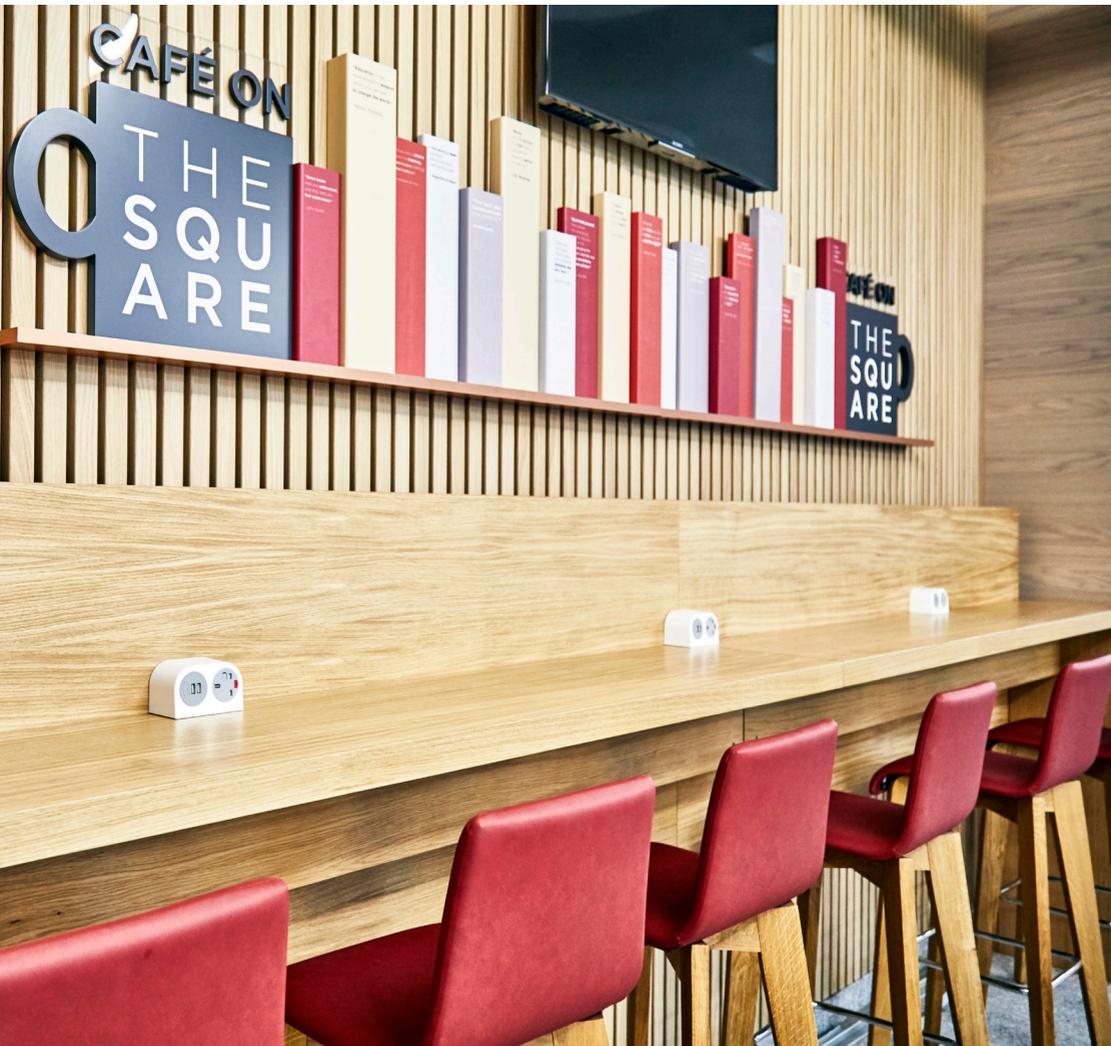

A compact power and USB fast charging module which can be installed into both hard surfaces and soft seating. The combined power and USB fast charging allows users to charge their laptops and mobiles at the same time.

## PHASE

PHASE can be specified with two standard power sockets or two TUF USB fast charging sockets or one of each. Available in white or black. Stylish, compact & robust PHASE is designed for on or under mounting. TUF-R optional.

PETRA integrated power and TUF usb fast charging.

## PUMA

Puma power modules have been integrated into each seat, providing both a standard power socket and TUF usb fast charging. PUMA can be fitted into virtually any panel or soft furnishings and can be specified to meet any requirements.

## INTEGRATED POWER

Puma and Petra are designed for spaces where integrated power is the preferred option. OE Elsafe can assist with design and specification to deliver the right solution for your space. Australian and international sockets are available.

# PLUTO

PLUTO is a stylish, colour coordinated and practical solution for the students at Canterbury University. With 2 standard power outlets and a TUF USB fast charger pluto provides students with 360° shared access to power.

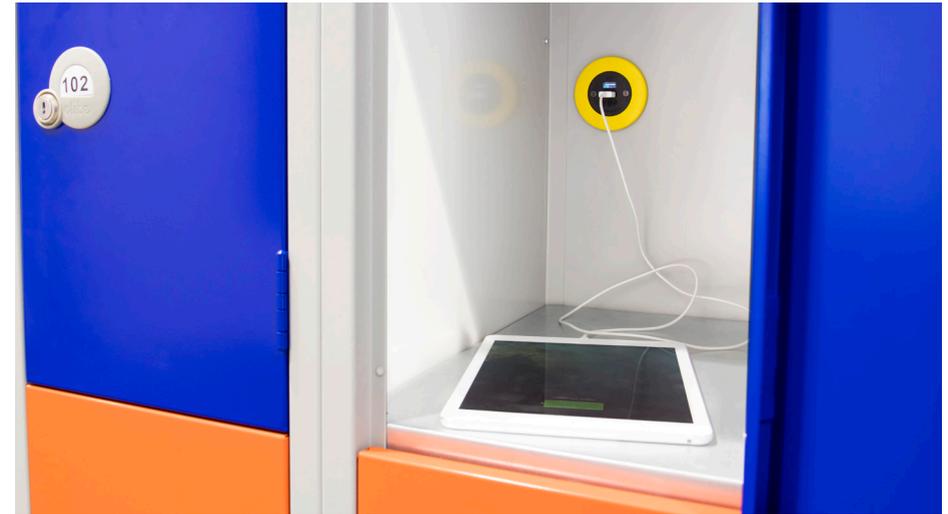

PLUTO has 3 socket outlets to power multiple devices at the same time.

## PIXEL-8

PIXEL-8 adds a splash of colour to any environment and is available in black or white with 8 coloured band options.

## PIP

PIP is equally at home in lockers, panel mounted or installed into soft furnishings. A single GPO or TUF USB fast charger PIP is designed to provide convenient power or fast charging anywhere. Available colours are black, white or a stainless steel finish with 8 optional coloured bezels. Guaranteed to brighten any space.

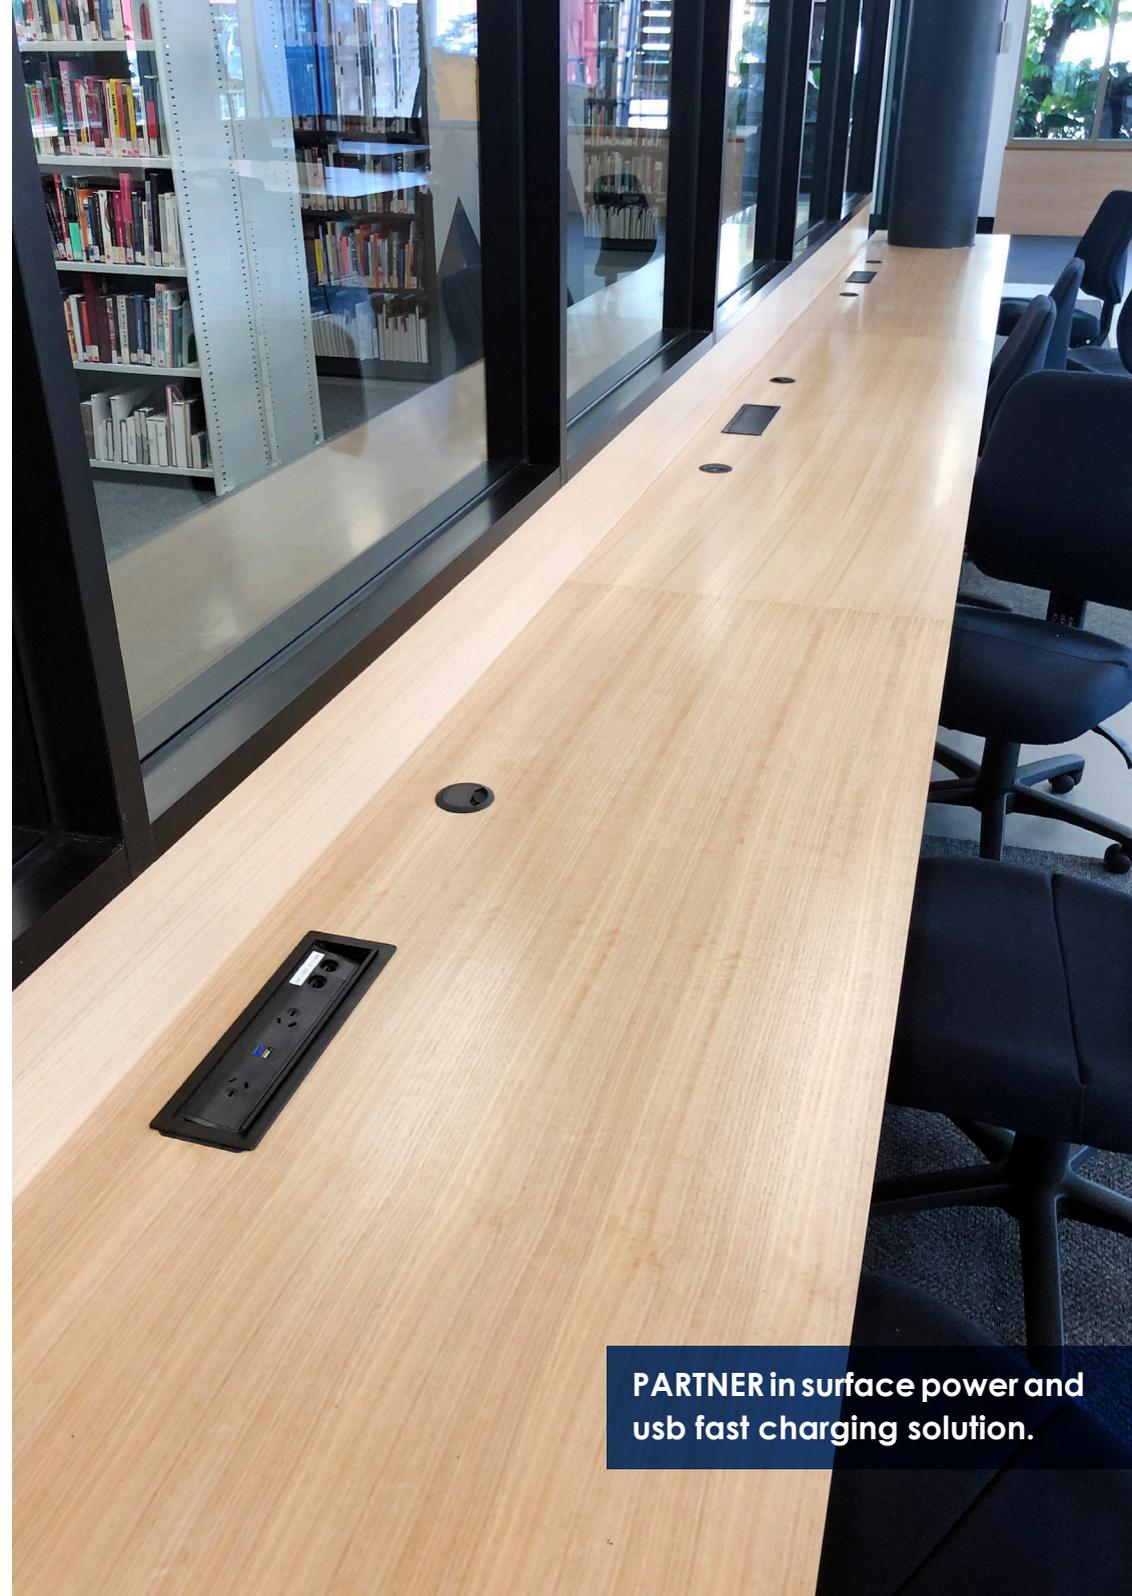

**ELITE** in surface power and usb fast charging solution.

## IN-SURFACE SOLUTIONS

OE Elsafe offer in-surface solutions that close to a near flush finish to maximise usable surface area. Elite (above) incorporates the surface material as the lid. Specify with power, data/av and usb fast charging.

**PARTNER** in surface power and usb fast charging solution.

## Wireless Fast Charging ARC-80

Commercial grade, robust and powerful, ARC-80 provides a wireless charging solution perfectly suited to high traffic areas. Sitting almost flush when installed taking up minimal surface area ARC-80 is also firmware upgradable. ARC-80 is designed to last, and is Qi certified.

The future is here -and its wireless.

## TUF-R Replacable

USB chargers are the most utilised piece of equipment in education today. The new TUF-R replaceable USB charging socket can be replaced with a simple tool if damaged - by anyone. Future proof your investment with the TUF-R, replaceable socket
