

HORIZON SUSPENDED ACOUSTICS

DESCRIPTION

- ▶ Horizon allows shapes to appear floating from ceilings and walls while increasing acoustic performance.
- ▶ With five geometric shapes, slick finished edges and clean hidden fixings, Horizon allows an easy yet good looking feature for hospitality spaces, open plan offices, meeting rooms, education facilities and lobbies.
- ▶ Utilising our sophisticated channels, clips and suspension wires, Horizon can be installed on ceilings and walls without the need for clear space, as minimal contact is made between the panel and the surface area; providing a floating aesthetic.
- ▶ For ceilings, Horizon's adjustable system allows you to set the suspension height with ease giving you the ability to target multiple frequency levels within the chosen space.
- ▶ Horizon can also be clipped to walls as a demountable acoustic panel, without the need for adhesives.
- ▶ Low VOC – beneficial for IEQ
- ▶ UV stabilised and resistant to colour fade so it'll always look as good as the day it was installed
- ▶ Not made from fibreglass or mineral fibre and does not contain formaldehyde, crystalline silica or other carcinogens, common to traditional fibrous absorbers
- ▶ Cleanable and easily demountable
- ▶ Hides ceiling services
- ▶ Includes high recycled content and is recyclable at the end of its life
- ▶ Highly durable so you're assured of long-term stability and performance
- ▶ Seismic bracing as per local building code requirements.
- ▶ Supplied with suspension kits for suspension or Frontier clips for direct fixing, fix with countersunk fastener appropriate for the substrate.
- ▶ Install as per Horizon Install Instructions.
