

## FRONTIER SUSPENDED CEILING ACOUSTICS

SIERRA

TUNDRA

AXIS

TALUS

DUNE

### DESCRIPTION

- ▶ Frontier offers targeted sound absorption, endless configurations, and stress-free installation without compromising acoustic performance.
- ▶ Frontier is an innovative acoustic system designed for targeted sound absorption for today's ever-changing open-plan workspaces, retail, education and hospitality applications.
- ▶ Formed by just three elements including Mounting Clips, Frontier Extrusions, and Acoustic Fins or Rafts, Frontier allows designers to mix and match colours and styles, create endless configurations, and enjoy quick and stress-free installations.
- ▶ Whether specifying Fin or Raft styles, Frontier offers incredible acoustic performance that can be 'tuned' for the space.
- ▶ Multiuse aluminium channels and clips allow for adjustment on-site, further enhancing the surrounding environment.
- ▶ Choose from 17 colours and nine styles, including Fins or Raft for a bold, dimensional statement.
- ▶ Create a more comfortable and personalised experience by tuning the acoustic effect. Simply move the Fins or Rafts closer together or further apart.
- ▶ Mount Fins or Rafts flush to the ceiling to 'blend in', fix them to rails or suspend them using extension rods.
- ▶ Frontier can be configured to fit the space perfectly.
- ▶ Fins and Rafts are made with our high performing, highly-compressed polyester material, which uses advanced fibre locking technology, instead of adhesives
